She should have foreseen that David would react that way, she told herself. It argued thoughtlessness or even stupidity on her part, was her accusation against herself. The truth was, however, that it was her impulse of gladness at something helpful she could do which had betrayed her.

David was in no enviable mood the next day as he sat in his office alone. He did not know what was keeping

Rourks species of all ages. At first not rectect." Rourke spoke ponderously and leaned back to watch the struggle for the work of the alchemists of the middle ages who first succeeded in isolating it in a metallic form.

Mercury occurs in nature as red sulphide or cinnebar, a substance which the North American Indian first used as a facial pigment long before the present day cometic came into Its discovery dates back to 300 years before the Christian era when the early alchemists separated it from cinnebar with copper and vinegar. Soon afterward powerful compounds of mercury were discovered and first used by Arabian physicians.

From this beginning, mercury has pecome an important and valuable article of commerce today. The early alchemists maintained mercury was not a metal because no other metal assumed the form of a liquid at normal temperature. This may be disproved by immersing a quantity of mercury in liquid air. The intense cold soon freezes the mercury into a solid block and its metallic nature may be established by driving nails into the hardest wood, the frozen mercury producing a ring like steel against the nail head.

The earliest supplies of mercury were all obtained abroad from Almaden and Idrian mines. Later, deposit of cinnebar were discovered in this country and today California and Texas are the main sources of the country's supply. Utah, Nevada, Oregon and Arizona also produce the metal, while Spain, Austria-Hungary, Russia, Italy and Mexico are other countries

HANDS A FRIGHT WITH PIMPLES

Itched Till Child Was Nearly Wild. Some Nights He Cried All Night. Now Entirely

HEALED BY CUTICURA SOAP AND OINTMENT

"My brother's hands started with pimples; some had water, and some seemed to have matter in them. His hands cracked and you could almost lay a slate pencil in the cracks. They itched so that he scratched till he was nearly wild, and they were a fright. We had him treated, but his hands were getting worse all the time, and some nights he cried all night.

"Then we got Cuticura Soap and Ointment, and it was not long before the itching stopped, and his hands began to heal. Now they are entirely healed and they have never bothered him since." (Signed) Mrs. W. G. Dow, Mandan, N. D., April 1, 1916.

Sample Each Free by Mail With 32-p. Skin Book on the treatment of the skin and scalp. Address post-card: "Cuticura, Dept. T, Boston." Sold throughout the world.

No. 36-Shell Fish (Continued)

In continuation of my last installment I will give you to-day recipes for the most tasty shell-fish offerings I have ever presented to my guests, commencing with:

Deviled Crabs.

One cup crab meat, picked from thells of well-boiled crabs, two tablespoons fine bread crumbs or rolled cracker, yolks of two hardboiled eggs chopped, juice of a lemon, one-half teaspoon mustard, a little cayenne pepper and salt, one cup good drawn butter. Mix one spoon crumbs with chopped crab meat, yolks, seasoning, drawn but-ter. Fill scallop shells—large clam shells will do-or small pate-panswith mixture; sift crumbs over top, heat to a slight browning in quick

Scalloped Lobster

Butter a deep dish and cover the bottom with fine bread crumbs; put on this a layer of chopped lobster, with pepper and salt; so on, alter-nately, until the dish is filled, hav-ing crumbs on top. Put on bits of butter, moisten with milk and bake about twenty minutes.

Lobster Newburg

Season one pint diced lobster with one-half teaspoon salt, dash cavenne, pinch nutmeg. Put in saucepan with two tablespoons but-

ter, heat slowly. Add two tablespoons sherry; cook five minutes; add one-half cup cream beaten with yolks of two eggs, stir till thick-ened. Take quickly from fire.

Oyster Fritters

Use plump, good-sized oysters; drain off juice, and to a cup of this juice add a cup of milk, a little salt, four well-beaten eggs, and flour enough to make batter like griddle-

Envelope an oyster in a spoonful of this batter, then fry in butter and lard, mixed in a frying pan the same as when frying eggs, turning to fry brown on both sides. Serve very hot.

Oyster Pie

One quart oysters, drained; pepper, salt, and butter to taste. One quart flour, two tablespoons lard, one tablespoon salt, mix with water for pie crust. Butter plate, line pie plate with crust; fill with oysters, seasoned; put over a crust and bake.

Scalloped Oysters

Pick, wash, and drain one quart oysters. Put in layers in bakingdish, alternating with dry bread or cracker crumbs and seasoning. When dish is filled add strained oyster liquor and sufficient milk to moisten. Cover with crumbs, add one tablespoon butter in bits, and bake one-half hour in hot oven.

Many a man with a will of his own has a codicil added to it by his wife. We all have a soft spot in our heads at birth-and some always retain it.

Mae Murray to Be "The Big Sister"

MAE MURRAY, LASKY STAR, IN PARAMOUNT PICTURES.

One of the first outward manifestations of the practical advantages of the ently formed merger of the Famous Players Film Company and the Jesse L. Lasky Feature Play Company is the fact that Mae Murray, who has appeared under the Lasky banner since her debut on the screen, is now working on waging her new Paramount picture, "The Big Sister." at the Famous Players studio under the direction of John B. O'Brien, Famous Players director,

Never before has such a situation arisen between the two companies except once in the case of Marguerite Clark, who was loaned to the Lasky Company for the production of "The Goose Girl," after she had created a sensation in her

screen debut in the Famous Players-Lasky production "Wildflower." In the case of Mae Murray, however, her conversion to the roster of Famous Players stars is only the first of many similar steps that are sure to be taken as circumstances warrant. It so happens that the atmosphere of "The Big Sister" is strictly Eastern in every aspect and that, although it could be produced at Hollywood, Cal., where the Lasky studios are situated, the trans-portation of Miss Murray to New York represents a far less expense than that which would be incurred in traveling on the Pacific coast in search of location and of devoting great areas of floor space to the erection of studio sets.
